

Introduction

- The following procedures are possible in the Aircraft-Operation-Information-Processing System.
 - Applications pursuant to the proviso of Article 79 of the Civil Aeronautics Act (take-off and landing at places other than airports and the like)
 - Applications pursuant to the proviso of Article 81 of the Civil Aeronautics Act (flight at an altitude below the minimum safety altitude)
 - Notification pursuant to the proviso of Article 89 of the Civil Aeronautics Act (dropping of objects)Also, permits can also be obtained (downloaded) from this system.
- This manual describes how to operate the Aircraft-Operation-Information-Processing System. Refer to it when implementing the necessary procedures.
- In order to deepen your understanding, see the [FAQ](#) page that has been released in the Aircraft-Operation-Information-Processing System in conjunction with this manual.
- We send all types of email notifications such as information required for use of the system, and the status of application procedures and the like, to the registered email addresses when registering applicant information. Before using this system, confirm that the domain of "information@aops.mlit.go.jp" can be received, in you email reception settings.
- Submit your application at least 1 to 2 weeks before the date you need permission because the review will take a certain amount of time. Furthermore, if there are deficiencies in the application content, it may take time for additional confirmation. Make sure you leave adequate time for your application.

Precautions for Using the Aircraft-Operation-Information-Processing System

- If operations are suspended for 120 minutes or longer during the application process in the Aircraft-Operation-Information-Processing System (no operations are implemented), you will need to start over. This is a protective feature that reduces the risk of personal information being leaked when a malicious third party sees your screen while you are away from your computer.
- This system does not provide external output functions such as PDF output and printing. Use the print function in your browser.
- If you are unsure about what information you need to enter into each form or how to fill out the form, hover your mouse over the  mark next to the item name on the form. That will display the information you need to fill out the form and a description of the information you need to fill out.
- When using the system, do not press any browser button, such as the browser's "Back" button or the "Refresh" button. This can cause the system to behave incorrectly.
- Simultaneous logins by multiple devices may cause the system to fail to work properly. Do not allow multiple, simultaneous logins.
- In the Aircraft-Operation-Information-Processing System, there are certain restrictions on the types of characters that can be used. Some special characters are not allowed. For example, the use of special characters such as "高" is restricted.
If you enter information containing these characters, the screen will display "prohibited characters are included."
When such a message is displayed, replace the restricted characters using characters that are permitted. For example, "高" instead of "高."
- On each screen, when transitioning to the next screen, the information entered on the screen before the transition is temporarily stored.
If you return to the previous screen using the "Back" button before moving to the next screen, be aware that the editing information entered before the return will be discarded. (Temporary storage is only temporary storage of the information entered on each screen, so if you want temporarily to save your application, Refer to the manual "Temporarily Save and Edit Your Application".)
- Please refrain from displaying and operating multiple Aircraft-Operation-Information-Processing Systems on separate tabs or panes.
This can cause an error, such as the application information you are entering cannot be processed properly, and you may need to enter the application information again.

Error Email Notification 1/2

If the system is unable to accept the application after the application has been made, the email "Notification of Application/Notification of Acceptance Error" will be sent.
There are two main reasons why this email is sent.

(1) Improper operation . . . [About the error email notification 2/2 Cause \(1\), \(2\)](#)

(2) System failure

Error Email Notification 2/2

■ Cause (1): Duplicate applications submitted for the same permit and notification in the past

- Ex.)
1. Save the draft of the continuation application to System Acceptance No. 0001.
 2. Save the draft of the continuation application for System Acceptance No. 0001.
 3. If you apply for a continuation application once drafted and saved in 1 and 2, you will get an error if you apply later.

Handling: On the [Application Information List] screen, confirm whether the application has already been implemented for the same application/notification. If it has been implemented, the application that caused the error has not been accepted. After the application procedure for the pending (notified) application is completed, implement the procedures for the continuation application, and the like, for the application.

■ Cause (2): Operated in multiple tabs and multiple browsers.

Handling: The application data may have been damaged. Implement application and notification procedures again.

■ When you don't recall Cause (1) or (2) above

Handling: Contact the government office to which you submitted your application with the "contact number" mentioned in the email.

Deleting and Cancelling Application Information

To delete or cancel application information through screen operations, perform the operation from the [Application Information List] screen. Refer to the manuals [“Temporarily Save, Edit, and Delete Your Application”](#) and [“Cancel Your Application”](#) for details on the procedures for “Delete” and “Cancel”.

※ The [Application Information List] screen can be accessed by the following steps:

[Main Menu] → Under the heading [Create an Application Form (Notification Form)], press the **申請情報一覧** button.

| システム受付 No | 手続名 | 手続種別 | 申請先 (届出先) | 申請日 (届出日) | 飛行期間 | 手続状況 | 許可番号 (許可日) | 詳細 | 追加手続き |

Setting Up and Changing an Account

Introduction

- In order to use the Aircraft-Operation-Information-Processing System, you must setup an account.
- There are two types of accounts available. They are an "Individual" and a "Corporate" account.
For personal use, setup an "Individual" account. For use by companies and organizations, setup a "Corporate" account.
- When you open an account, your personal (or company) information will be automatically applied when you use "Individual Number Card" for individuals and "gBizID" for corporations.
- The information registered by setting up an account is automatically posted at the time of each application.

- 13. Changing Account Information [Change Your Account Information]
- 14. Changing Account Information [Confirm Your Input Information, and Change Your Account]

01. Setting Up an Account

Setup the necessary account in order to use the Aircraft-Operation-Information-Processing System.

Start Setting Up an Account

Agree to the Terms of Service of the Aircraft-Operation-Information-Processing System

Go to the page to setup an account and agree to the terms of service.

Enter Information Needed to Setup an Account

Enter the necessary information such as your name and address and contact information.

Confirm your Information, and Setup Your Account

Confirm whether there are any mistakes in your information, and setup your account.

Complete Setting Up Your Account

Your login ID will be sent to the email address you entered. If you want to continue with the application process, log in to the Aircraft-Operation-Information-Processing System.

Items to be entered will vary depending on whether the person using the Aircraft-Operation-Information-Processing System is an "individual" or a "company/organization (corporation)."

For registration procedures after setting up an account, if you are an individual, setup an account for an individual. If you are a company or organization (corporation), setup a corporate account.

* As input assistance when registering an account, for individuals, use your Individual Number Card, and for a corporate account, use gBizID.

02. What You Need to Setup an Account

The items required in the procedures varies depending on whether you are an individual or a corporation, and the content of the procedures.

Advance to the procedures after confirming what is required.

| | Individual | Corporation |
|---------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

トップページへ

Once your account is setup, you will be taken to the account completion page. Your login ID will be sent to the email address you entered. You will not be notified of your password. Manage the password you set by yourself.

In order to continue with the new application process, you will need to log in from the top page.

06. Read the Card Information on Your Individual Number Card

In the Aircraft-Operation-Information-Processing System, you can obtain input assistance by using your Individual Number Card registration information when you implement the procedures for your personal account. In this manual, we will describe using a method to read your card information on your Individual Number Card at that time.

The following patterns are available for reading your card information on your Individual Number Card, depending on the device you are using.

Detailed instructions for each pattern are available at the following pages.

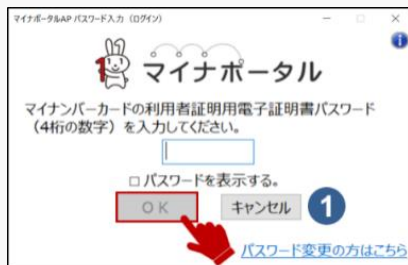

- [Apply using a computer and read using an IC card reader. \(IC card reader authentication\)](#)
- [Apply using a computer and read using a smartphone. \(2D barcode authentication\)](#)

07. Read the Card Information on Your Individual Number Card (Apply using a computer and read using an IC card reader.)

In order for the IC card reader to read the card information in the IC chip of your Individual Number Card, it is necessary to install the Mynaportal App on your computer. If you have not installed this on your computer, or if some time has passed since you installed it, check the installation and update procedures to prepare in advance. Refer to the [operation manual of the Mynaportal "Chapter 2. Using the Mynaportal \(login preparation using the IC card reader writer\)"](#) for the procedures using in preparation in advance.

* When you click on the link, an external website will open.

[Windows Screen]

[Reading Procedures]

1. Check that the IC card reader is connected to the device.
Follow the steps in each procedure to start IC card reader authentication.
 2. Follow the instructions on the procedure page to create a 4-digit PIN or enter a 6-16 digit alphanumeric PIN and press the "OK" button.
 3. When the reading of your Individual Number Card surface information is completed, the system will shift to the next screen.
-
- ※ The 4-digit PIN is the PIN set by the applicant at the counter of the municipal office (the password for the digital certificate for user certification and the password for the card information entry assistant). If you make a mistake 3 times consecutively, your account will be locked and service will be temporarily unavailable.
 - ※ The 6-16 digit alphanumeric PIN is a password for the electronic certificate of the bearer's signature set by the applicant themselves they receives the Individual Number Card at the counter of the municipal office. If you make a mistake 5 times consecutively, your account will be locked and the service will be temporarily unavailable.
 - ※ To unlock your account, you will need to go through procedures at the counter of the municipal office.

08. Read the Card Information on Your Individual Number Card (Apply using a computer and read using your smartphone)

In order to read data using your smartphone, you need to install the Mynaportal App on your smartphone. If you have not installed this on your smartphone, check the installation and update procedures to prepare in advance. Refer to the [operation manual of the Mynaportal "Chapter 2. Using the Mynaportal \(login preparation using a 2D barcode\)"](#) for the procedures using in preparation in advance.

* When you click on the link, an external website will open.

[Reading Procedures]

1. Follow the instructions on the procedure page to display the 2D barcode on your computer.
2. Boot up the Mynaportal App on your smartphone.
3. Press the 2D barcode mark at the bottom right of the app screen.
4. Press "Read Barcode" to read the 2D barcode.
5. Enter your 4-digit PIN or your 6-16 digit authentication PIN and press the "OK" button. (When the reading of your Individual Number Card surface information is completed, the system will shift to the next screen.)
6. Pass your Individual Number Card over your smartphone.

- ※ The 4-digit PIN is the PIN set by the applicant at the counter of the municipal office (the password for the digital certificate for user certification and the password for the card information entry assistant). If you make a mistake 3 times consecutively, your account will be locked and service will be temporarily unavailable.
- ※ The 6-16 digit alphanumeric PIN is a password for the electronic certificate of the bearer's signature set by the applicant themselves they receives the Individual Number Card at the counter of the municipal office. If you make a mistake 5 times consecutively, your account will be locked and the service will be temporarily unavailable.
- ※ To unlock your account, you will need to go through procedures at the counter of the municipal office.

10. Changing Account Information

Changing Account Information

Start Changing Account Information

Login to Aircraft-Operation-Information-Processing System

Log in from the login button in the top, right-hand corner of the homepage.

Change your account information

Open the page to change your account information, then change the information.

Confirm the information that you entered and set the changes

Confirm the changes on the confirmation page to set the changes.

Completing Changes to Account Information

When you complete making changes to your account information, you will be notified by email to your registered email address.

If you linked with gBizID when you set up a corporate account, you will need to read gBizID again when you change your information.

* You can manually change the information of the manager.

See ["09. Flow of Authentication Using gBizID"](#) for details on how to authenticate using gBizID. Once you have confirmed the method, prepare your gBizID and proceed to check and change your account.

11. What You Need to Change Your Account Information

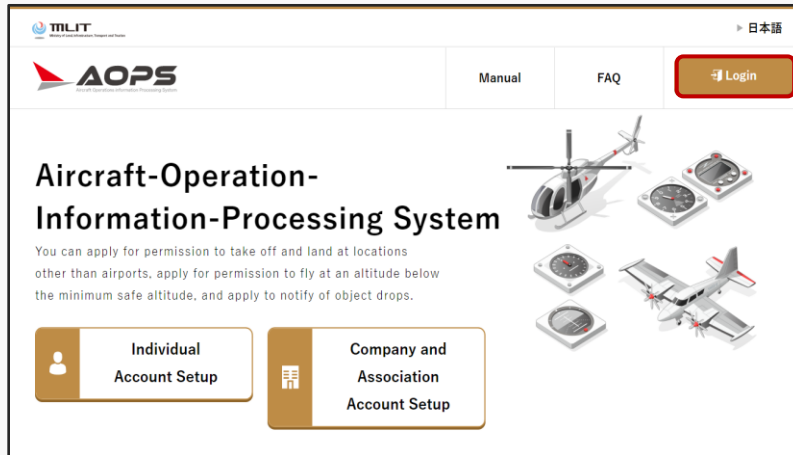

The items required in the procedures varies depending on whether you are an individual or a corporation, and the content of the procedures.

Advance to the procedures after confirming what is required.

| | Individual | Corporation |
|--------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Account Information to Change | <u>Items Requiring Changes from the Information in the Account Below</u> <ul style="list-style-type: none"> • Name • Furigana • Address • Date of Birth • Telephone • Email Address | <u>Items Requiring Changes from the Information in the Account Below</u> <ul style="list-style-type: none"> • Corporate Number • Company and Association Name • Representative name • Location of head office or principal office • Manager Assignment • Manager Name • Country and Region • Manager Telephone Number • Manager Email |
| Others * When using you Individual Number Card and gBizID as input assistance | <ul style="list-style-type: none"> • Individual Number Card • A card reader or smartphone for reading the card face information in the IC chip on your Individual Number Card | <ul style="list-style-type: none"> • gBizID (Prime, Member, Entry) |

* You can setup an account without linking with your Individual Number Card or gBizID.

12. Changing Account Information [Login to Aircraft-Operation-Information-Processing System]

Log in from the  in the right-hand side of the homepage.

The screenshot shows the login page (ログイン). The page is divided into two main sections. The left section, titled 'アカウントを開設済の方' (For those who have already set up an account), contains fields for 'ログインID' (Login ID) and 'パスワード' (Password), a link for 'ログインIDを忘れた方はこちら' (Click here if you forgot your login ID), a link for 'パスワードを忘れた方はこちら' (Click here if you forgot your password), and a 'ログイン' (Login) button. The right section, titled 'まだアカウント作成がお済みでない方' (For those who have not yet set up an account), contains two buttons: '個人の方のアカウント開設' (Set up individual account) and '企業・団体の方のアカウント開設' (Set up corporate/organization account). At the bottom left, there is a '戻る' (Back) button.

Enter your ID and password for the account you setup on the login page, and press the .

Once you have successfully logged in, the system will shift to the main menu. There, you can proceed to check and change your account.

13. Changing Account Information [Change Your Account Information (Individual)]

Press the button for the account name to select

アカウントの確認・変更

Open the page to change your account information.

Changing the account information, then press

確認

after

Advancing to the page to confirm the changed content.

If you are using input assistance using your Individual Number Card registration information, press **マイナンバーカード情報連携** and proceed to read the card information.

| Procedure Type | Overview |
|-----------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| New Application (New Notification) | <p>Implements a new application and notification.</p> <ul style="list-style-type: none">* Before applying, register the aircraft information, pilot information, and passenger information.* When taking off and landing at a place other than the airfield (application for permission in the proviso to Article 79 of the Civil Aeronautics Act), register the take-off and landing area information in advance.* When implementing an application and notification for the first time in this system for applications and the like that have been processed in writing or by email or the like, implement the procedures from "New Application (New Notification)." In such cases, provide information such as the past application number (application date) and permit number (permit date) in "Other Reference Items."* You can make a new application (notification) by copying (citing) a past application. |
| Changes to Application (Changes to Notification) | <p>After a permit has been issued and acceptance of the notification, change the details and the like of the currently valid application and notification, and re-implement the procedure.</p> <ul style="list-style-type: none">* When adding or changing the location to implement the application and notification, apply separately from "New Application (New Notification)" and the like.* The flight end date when changing the application is the same as the flight end date of the original permitted application (notification). See Here for details. |

Descriptions Each Procedure 2/2

The following defines the "procedure types" used in this system.

| Procedure Type | Overview |
|----------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Continuing an Application and Reapplying (Continuing Notification and Re-notification) | <p>Renew the flight period of an application or the like permitted in the past, and implement the procedures again.</p> <ul style="list-style-type: none">* It is possible to change some of the details of the original permit application in line with a renewal of the flight period.* When applying and notifying in a location that has not been approved or had records notified in the past, apply from "New Application (New Notification)."* See Here for the flight periods that can be applied for in Continuing an Application and Reapplying and the like. <p>[Continuing an Application and Reapplying] Implement the procedure to continue the flight period for an application or the like permitted in the past. [Reapplying/Notification] Implement procedures again for a different flight period (meaning when the flight period was not continued) for an application that was permitted in the past.</p> |
| Procedure After Verbal Permission (in Case of a Disaster or the Like) | <p>Implement the procedure verbally in the event of a disaster, or the like, and implement the application procedures after receiving permission and the like.</p> <ul style="list-style-type: none">* Before applying, register the aircraft information, pilot information, and passenger information.* When taking off and landing at a place other than the airfield (application for permission in the proviso to Article 79 of the Civil Aeronautics Act), register the take-off and landing area information in advance. |

- 12. New Applications [Confirm the Application (Notification) Information]
- 13. New Applications [Confirm the Submission Complete E-mail]

01. Flow of New Applications (Notification) 1/2

The following shows the flow when making a new application (notification) using this system.

Register each master control information.

The aircraft information, pilot information, passenger information (for Article 81 of the Civil Aeronautics Act), and take-off and landing area information (for Article 79 of the Civil Aeronautics Act) that are required for the application must be registered in advance.

Start the procedures for the new application (notification).

Select New Application (Notification)

Select the "New Application (New Notification)" button in the Main Menu, and then select the "New Applications" button in the dialog box.

Select the Application to Be Processed (Article 79, Article 81, and Article 89 of the Civil Aeronautics Act)

Select the target article, the type of aircraft, the location for action to be implemented, and the application destination (notification destination).

Enter Basic Information * For Corporations Enter Basic Information * For Individuals

Enter the applicant information, and an overview of the flight plan.

*** Enter only when selecting Article 79 of the Civil Aeronautics Act**

Article 79 of the Civil Aeronautics Act Select the Locations for Take-Off and Landing

Select the take-off and landing locations to apply for from the registered list on the master management screen.

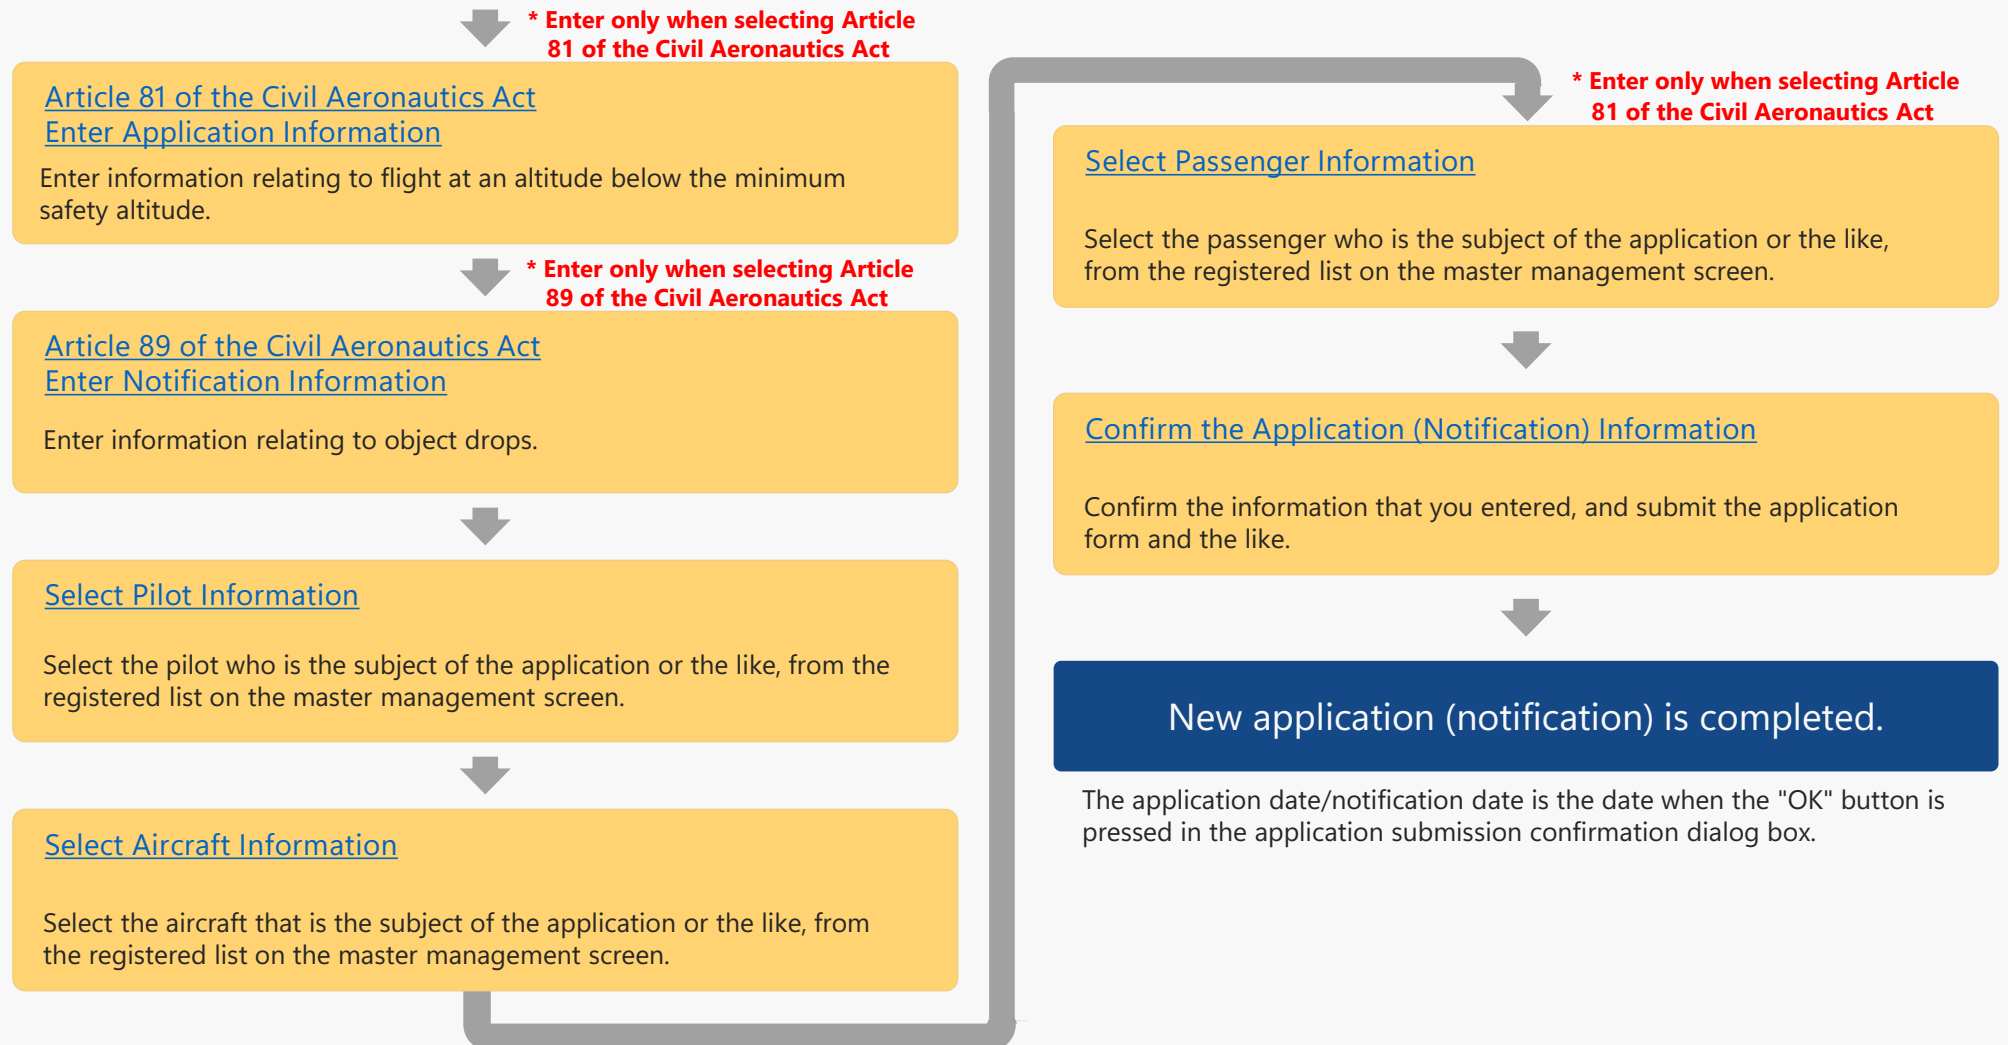

*** Enter only when selecting Article 79 of the Civil Aeronautics Act**

Article 79 of the Civil Aeronautics Act Enter Application Information (Other Than Take-Off and Landing Locations)

Enter information on take-off and landing at a location other than the airport.

01. Flow of New Applications (Notification) 2/2

The following shows the flow when making a new application (notification) using this system.(Continued)

02. New Applications [Select New Application (Notification)]

* It is necessary to register each master control information in advance for the aircraft information, pilot information, passenger information (for Article 81 of the Civil Aeronautics Act), and take-off and landing area information (for Article 79 of the Civil Aeronautics Act) that are required for the application.

* Individuals

Should see: [04. New Applications \[Enter Basic Information\] 3/4 to 4/4](#)

Enter the applicant information.

- (1) If there is a document control number in the application form, enter it here. (Optional)
- (2) When entering the information, the corporate number, the name of the company or organization, the name of the representative, the location of the head office or main office and the contact information of the person in charge are automatically entered, from the logged-in account information.
- * The account information of those who are connected to gBizID on this screen is automatically entered and cannot be revised on the [Basic Information, Flight Plan Overview Input] screen. If you need to make corrections, implement the application procedures after changing your account information with gBizID. When revising your account information, and temporarily saving the application information, see [this](#).
- (3) For emergency contact information, select "Other than the above" and list where contact can be made in an emergency (name and telephone number) if it is different from the contact information (name and telephone number) of the person in charge.

04. New Applications [Enter Basic Information] 2/4

[For Corporations] Enter the applicant information, and an overview of the flight plan. (Continued)

Enter an overview of the flight plan.

* You can enter up to 500 characters in each entry field.

(4) Enter the purpose of the flight.

(5) Enter the period of the flight, the flight time, and the flight path. Also, if the flight time zone includes nighttime, always select "Includes Nighttime."

* For the flight time, select and enter the widest time zone if it differs from depending on the day, and enter the details in the remarks field.

(Example: Select "All day" even if there is one day that you will fly all day in the flight period, and in the remarks column, enter "〇/〇 to 〇/〇 from XX:XX to XX:XX, and from 〇/〇 to 〇/〇, XX:XX to XX:XX.")

* For applications for take-off and landing locations (applications for the proviso of Article 79 of the Civil Aeronautics Act), when applying for take-off and landing at multiple locations and the time of take-off and landing differs depending on the location, select and enter the flight time considering the location with the widest take-off and landing time zone, and enter the details in the remarks field.

(Example: When there is a take-off and landing location for take-off and landing "All Day" and when there is a take-off and landing location with take-off and landing "from sunrise to sunset," select "All Day" and enter "The time for take-off and landing varies depending on the location" in the remarks field).

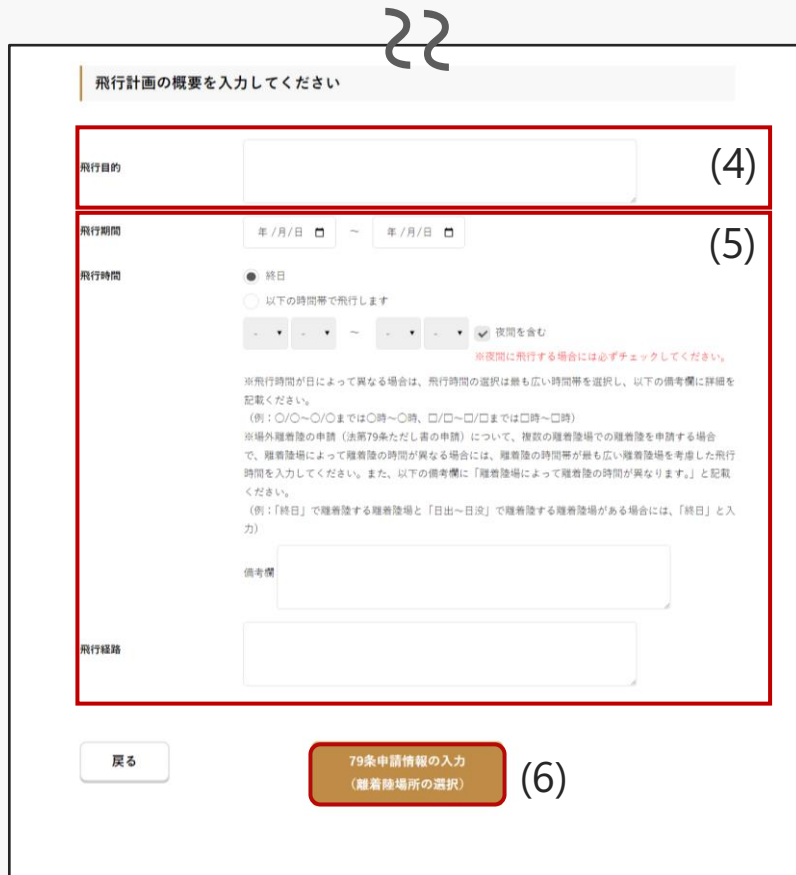

(6) After finishing entering the information, press the button displayed at the bottom center of the screen.

* The name of the button displayed will vary depending on the article to implement the procedure.

➤ If the procedures set forth in Article 79 of the Civil Aeronautics Act are included, the **79条申請情報の入力 (離着陸場所の選択)** is displayed.

➤ If the procedure in Article 79 of the Civil Aeronautics Act is not included, and the procedure in Article 81 of the Act is included, the **81条申請情報の入力** is displayed.

➤ For only the procedure for Article 89 of the Civil Aeronautics Act, the **89条申請情報の入力** is displayed.

The screenshot shows a web form for entering flight plan information. At the top, a header bar says "飛行計画の概要を入力してください". Below it, there are several input fields and sections:

- 飛行目的 (Flight Purpose):** A text input field, annotated with (4).
- 飛行期間 (Flight Period):** A section containing date pickers for start and end dates, annotated with (5).
- 飛行時間 (Flight Time):** A section with radio buttons for "終日" (All day) and "以下の時間帯で飛行します" (Fly in the following time zone). There are also dropdown menus for time zones and a checkbox for "夜間を含む" (Include nighttime). A note below says "※夜間に飛行する場合には必ずチェックしてください。" (Please check if you are flying at night).
- 備考欄 (Remarks):** A large text area for additional information.
- 飛行経路 (Flight Path):** A text input field at the bottom.

At the bottom of the form, there are two buttons: "戻る" (Back) on the left and a larger button labeled "79条申請情報の入力 (離着陸場所の選択)" (79th Article Application Information Input (Take-off and Landing Location Selection)), annotated with (6).

In the list, all the information registered on the master management screen is displayed. Also, if there are more than 21 take-off and landing locations, it will be displayed on multiple pages.

(1) When searching for the take-off and landing location, enter the [Off-site ID], [Name], [Address], and [Type], and the like. When you press the "Search" button, the corresponding take-off and landing location is displayed.

* [Name] and [Address] can be partially matched in the search.

* Even if you press the 検索 after selecting at (2), the selections you have already made will be maintained.

(2) Please select the leftmost box for the take-off and landing locations to apply for.

* You cannot add a take-off and landing location or change the take-off and landing location information on this screen. If it is necessary to add or the like, implement the procedure after adding or changing the registration the on the master management screen.

When adding or changing the take-off and landing location, and temporarily saving the application information, see [this](#).

(3) When "Select All" is selected, all take-off and landing locations displayed on the screen will be selected.

* If there are multiple pages, even if you check "Select All," take-off and landing locations that are not displayed on the screen are not selected.

(4) Once all take-off and landing locations to apply for have been selected, press the 79条申請情報の入力
(続き).

The screen for entering application-specific information under Article 79 of the Civil Aeronautics Act will open.

06. New Applications [Article 79 of the Civil Aeronautics Act Enter Application Information (Other Than Take-Off and Landing Locations)] 1/5

* The content displayed will vary depending on selections made so far, such as the type of aircraft to be applied for and the type of take-off and landing location.

In the conceptual view of the screen on the left is an example of the screen display when selected as shown below.

■ Select "Rotorcraft" and "Tokyo Airport Administrative Office" on the [Procedure Selection] screen

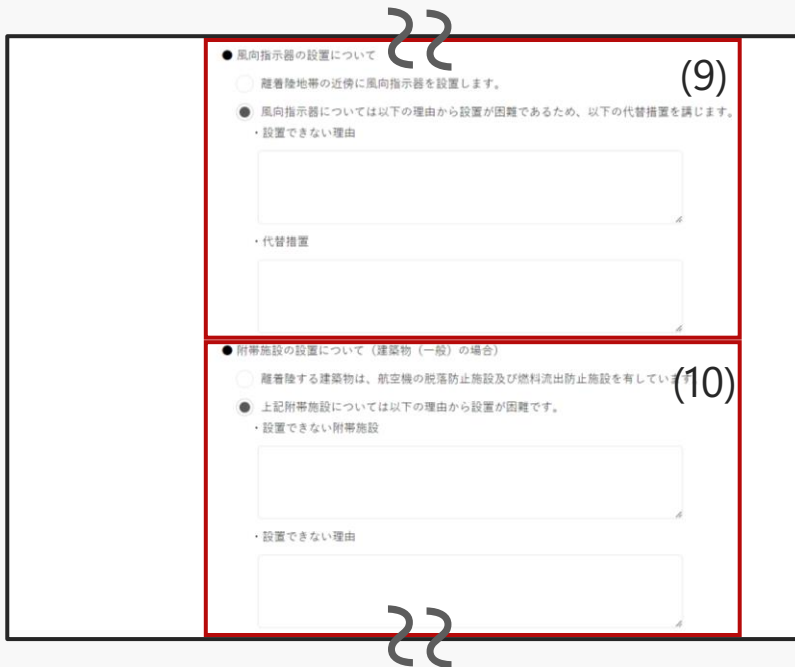

■ Select the take-off and landing location that corresponds "Buildings (general)" and "Ground (disaster prevention)" on the [Select Take-Off and Landing Location] screen

(8) If installation is difficult, for "Installation of Signs, and the Like," enter the signs that cannot be installed and the reasons.

* You can enter up to 500 characters in each entry field.

06. New Applications [Article 79 of the Civil Aeronautics Act Enter Application Information (Other Than Take-Off and Landing Locations)] 4/5

Enter information on take-off and landing at a location other than the airport. (Continued)

The screenshot shows a form with two main sections, (9) and (10), each with a red border and a large '22' icon. Section (9) is titled '風向指示器の設置について' (Regarding the installation of the wind direction indicator). It has two radio buttons: the first is '離着陸地帯の近傍に風向指示器を設置します。' (Install a wind direction indicator near the take-off and landing area), and the second is '風向指示器については以下の理由から設置が困難であるため、以下の代替措置を講じます。' (Regarding the wind direction indicator, it is difficult to install for the following reasons, so the following alternative measures will be taken). The second option is selected. Below it are two text input fields labeled '・設置できない理由' (Reasons for not being able to install) and '・代替措置' (Alternative measures). Section (10) is titled '附帯施設の設置について（建築物（一般）の場合）' (Regarding the installation of ancillary facilities (in the case of buildings (general))). It also has two radio buttons: the first is '離着陸する建築物は、航空機の脱着防止施設及び燃料流出防止施設を有している' (Buildings for take-off and landing have aircraft de-icing facilities and fuel spill prevention facilities), and the second is '上記附帯施設については以下の理由から設置が困難です。' (Regarding the above ancillary facilities, it is difficult to install for the following reasons). The second option is selected. Below it are two text input fields labeled '・設置できない附帯施設' (Ancillary facilities that cannot be installed) and '・設置できない理由' (Reasons for not being able to install).

Enter other items for reference. (Continued from the previous page)
Follow the screen to select and enter applicable items.

* You can enter up to 500 characters in each entry field.

(9) If installation is difficult, for "Installation of Wind Direction Indicator," enter the reasons and alternative measures.

(10) If installation is difficult, for "Installation of Ancillary Facilities," enter the ancillary facilities that cannot be installed and the reasons.

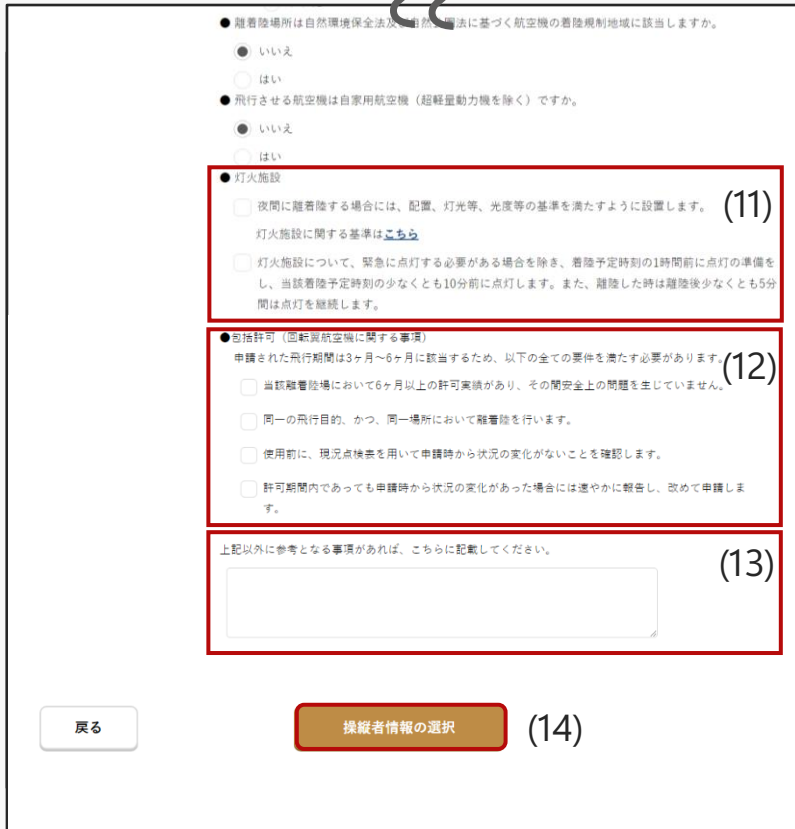

* The content displayed will vary depending on selections made so far, such as the type of aircraft to be applied for and the type of take-off and landing location.

In the conceptual view of the screen on the left is an example of the screen display when making selections that include the take-off and landing location that corresponds to "Buildings (general)," on the [Select Take-Off and Landing Location] screen.

追加入力

- (1) For "Path to Fly at Low Altitude," select "Prefecture," and in the field on the right, enter an address to the municipality that doesn't include the street number.
Supplement with drawings and the like showing the flight path for the detailed location as an attachment.

In the case of territorial sea or on the high seas, select the applicable one for each, and enter an approximate location ("offshore of the XX prefecture," or the like) in the field on the right.

Also, if there are multiple places in the same municipality where you will fly at a low altitude, enter the total number of places in the municipality and supplement the detailed location with a drawing of the flight path.

* You can enter up to 200 characters in each entry field.

- (2) Enter the "Altitude to Fly at Low Altitude."
(If there is an altitude width, enter the lower limit and the upper limit values.)
* Select either "m" or "ft" for the unit.
- (3) In the "Remarks" field, describe if necessary when there is supplementary information, such as if the altitude of flight is different for an aircraft or rotorcraft, and others.
(Ex.: For altitude, an airplane will be X-X m, and a rotorcraft will be Y-Y m)

- (4) When applying for low-altitude flight in multiple locations (cities and towns), press the **追加入力**.

* You can register up to 200 cases.

22

■お問合せ番号

There are two main reasons why reception can fail.

1. Duplicate applications for the same permit and notification in the past
2. Operated in multiple tabs and multiple browsers

If the reasons given above do not seem to apply to you, contact us through ["FAQ"](#) with the following information.

"Login ID" "date and time of receiving the email" "inquiry number written in the email" "terminal (OS) used" "browser used"

- 03. Copy [Selecting an Application (Notification) to Copy]
- 04. Copy [Revising Application (Notification) Information]
- 05. Copy [Confirming Application (Notification) Information]
- 06. Copy [Confirm the Submission Complete E-mail]

01. Flow of New Application (Notification) Using a Copy

The following shows the flow when making a new application (notification) using a copy in this system.

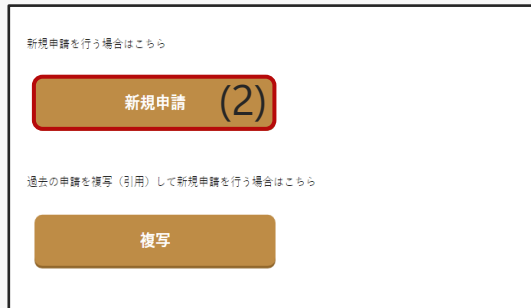

02. Copy [Selecting Copy]

* It is necessary to register each master control information in advance for the aircraft information, pilot information, passenger information (for Article 81 of the Civil Aeronautics Act), and take-off and landing area information (for Article 79 of the Civil Aeronautics Act) that are required for the application.

(1) In the main menu screen, press **新規申請 (新規届出)** in the heading of [Create an Application Form (Notification Form)].

(2) Press the **複写** in the dialog of the "New Application" button and the "Copy" button.

The screen for selecting the application procedure is opened.

03. Copy [Selecting an Application (Notification) to Copy]

Select the application (notification) to be copied from the [Application Information List].

基本情報の入力

It is possible to revise the information of the application (notification) of the copy source selected in the [Application Information List].

- * Past inputted information is applied as is to the screen, so implement the procedures after confirming and revising the content entered, such as the applicant information, and the flight date and time, and the like.
- * In the unlikely event that an application is made using a past application accidentally after copying, contact application destination quickly to withdraw that application.

Various input screens ([Procedure Selection] screen → [Enter Basic Information] screen → [Enter Information by Application] screen) are the same as the manual "[New Applications](#)".

Follow the screen to select or enter (revise) pertinent items.

05. Copy [Confirming Application (Notification) Information] 1/2

Confirm the information that you entered, and submit the application and the like.

Make a final confirmation of the application (notification) information.

(1) If there is an error in the inputted content, press the  at the bottom right of each information to revise the information.

* When you press the  button for each screen, you will transition to the appropriate screen. After correcting the information you entered on each screen, please use the button in the center of the bottom row to move to this screen.

(2) If you want temporarily to save the application information, press the .

Also, if you want to edit the temporarily saved application again, see [this](#).

(3) If there is no problem with the content you entered, press the . A dialog box is displayed for confirmation before submission.

05. Copy [Confirming Application (Notification) Information] 2/2

Confirm the information that you entered, and submit the application and the like. (Continued)

申請／届出を行います。
※以下のOKボタンの押下日が「申請日／届出日」となります。

OK キャンセル

When you press the **OK** , the [Application Date/Notification Date] is automatically added, and the application form is submitted to the application destination.

An email will be sent to confirm your submission of your application form (notification).

- If received successfully, you will receive an email stating that the submission has been completed.
- If we fail to receive it, you will receive an error email stating that the system was unable to accept it.

[Confirm the Submission Complete E-mail]
- [Reference] Conceptual view of flight period when continuing an application and reapplying (continuing notification and re-notification) and changing the application (notification)

01. Flow of Continuing an Application and Reapplying (Continuing Notification and Re-notification)

The following shows the flow when continuing an application and reapplying (continuing and re-notification) using this system.

Confirm each master control information.

Check whether there are any changes to the aircraft information, pilot information, passenger information (for Article 81 of the Civil Aeronautics Act), and take-off and landing area information (for Article 79 of the Civil Aeronautics Act) from the previous application.

For changes to the aircraft, pilot, passenger, and take-off and landing area information, always add and/or change the registration from the master control information before starting the procedure.

(It is not possible to add or revise this information on the information entry screen for each application (notification). In particular, for the information of the take-off and landing area, implement the procedures to revise the latest information on the time zone for take-off and landing and the existence of nighttime.)

* When taking off and landing in a place that has not been approved in the past, it is not a continuing application or re-application; Make a new application.

* If you have deleted the aircraft information, pilot information, or take-off and landing location information selected in a previous application, please select an additional check in the dialog box.

Start Continuing an Application and Reapplying (Continuing Notification and Re-notification)

Select Continuing an Application and Reapplying (Continuing Notification and Re-notification)

Select the "Continuing an Application and Reapplying (Continuing Notification and Re-notification)" button in the main menu.

Select the Application (Notification) to Continue an Application and Reapply (Continuing Notification and Re-notification)

Select the application (notification) as the source for the continuing an application and reapplication (continuing an application and re-notification) from the list of application information and select the item to change.

Revising the Application (Notification) Information

If necessary, revise the application information on the entry screen for each application (notification) information.

Confirm the Application (Notification) Information

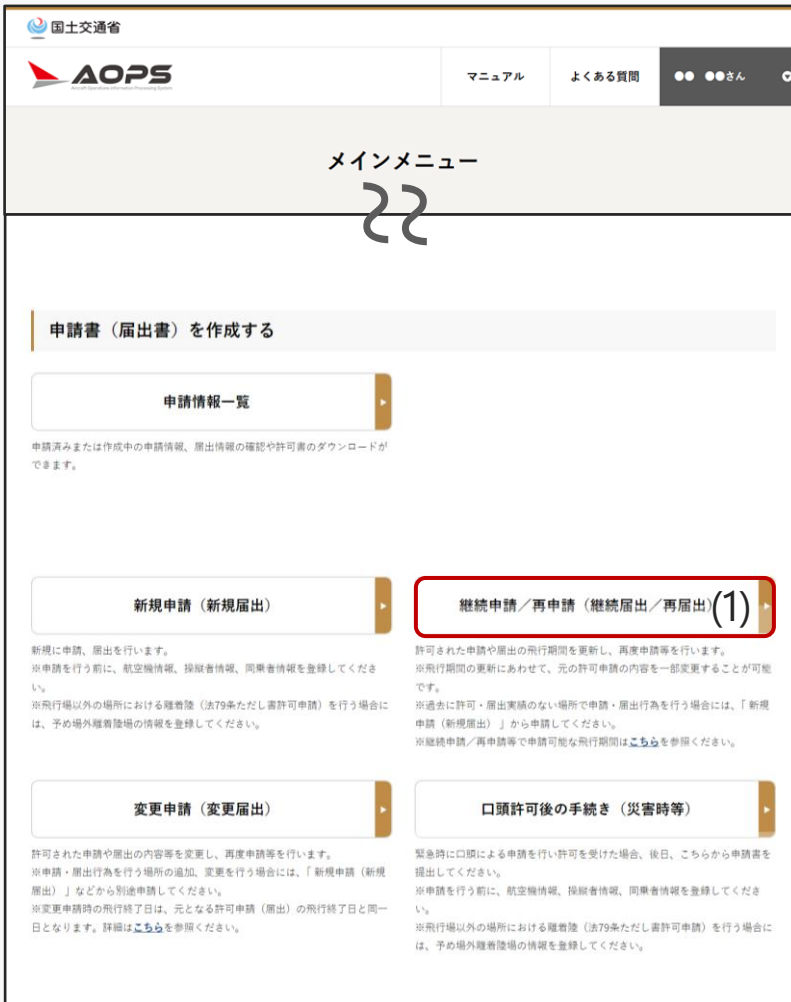

Confirm the information that you entered, and submit the application and the like.

Complete Continuing an Application and Reapplying (Continuing Notification and Re-notification)

The application date/notification date is the date when the "OK" button is pressed in the application submission confirmation dialog.

02. Continuing an Application and Reapplying (Continuing Notification and Re-notification) [Select Continuing an Application and Reapplying (Continuing Notification and Re-notification)]

* For changes to the aircraft information, pilot information, passenger information (for Article 81 of the Civil Aeronautics Act), and take-off and landing area information (for Article 79 of the Civil Aeronautics Act), always add and/or change the registration from the master control information before starting the procedure.

(1) Press the **継続申請／再申請（継続届出／再届出）** in the heading of [Create an Application Form (Notification Form)], on the [Main Menu] screen.

Open the [Application Information List] screen.

03. Continuing an Application and Reapplying (Continuing Notification and Re-notification) [Select Application (Notification) for Continuing an Application and Reapplying (Continuing Notification and Re-notification)] 1/4

Select the application (notification) as the source for the continuing an application and reapplying (continuing an application and re-notification) from the [Application Information List].

For the input method for application information in the [Enter Basic Information] screen and the [Enter Information by Application] screen, it is the same as that described in the manual "[New Applications \[Enter Basic Information\] screen and \[Enter Information by Application\] screen](#)".

- * Items that can be changed will vary depending on the details selected in the dialog box to select the items to change.
- * Input is restricted to items that cannot be changed. If you are unable to make the necessary corrections, retry the procedure or make a new application to review the selection of "Items to Change".
- * In the conceptual view of the screen on the left is an example of the screen display when the applicant is an individual.

04. Continuing an Application and Reapplying (Continuing Notification and Re-notification) [Revise Application (Notification) Information] 4/4

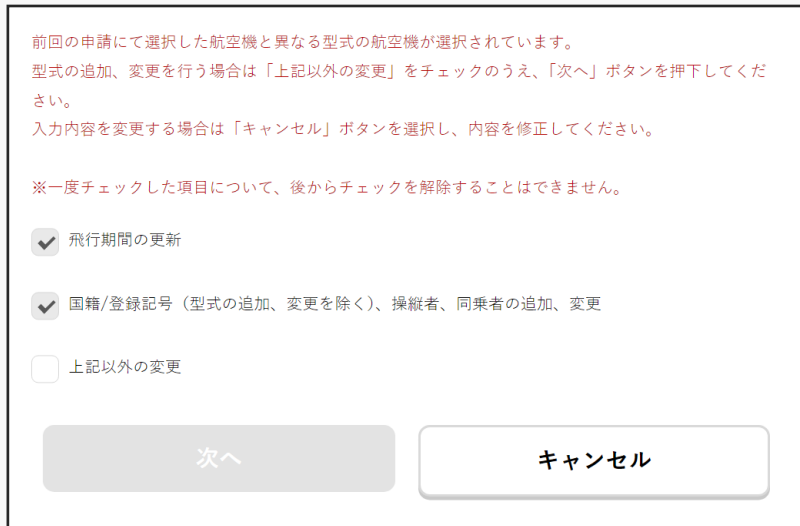

If necessary, revise the application information on the entry screen for each application (notification) information. (Continued)

On the [Select Aircraft Information] screen, when selecting a model that is not included in the original application of the Continuing Application and Reapplication (Continuing and Re-notification), you cannot transition to the next screen without selecting "Changes Other Than the Above."

* For items that have been selected once, you cannot clear the selection later.

* It is acceptable to select a different "Nationality/Registration Mark" with a model that is the same as the model included in the Continuing an Application and Reapplying (Continuing Notification and Re-notification)

05. Continuing an Application and Reapplying (Continuing Notification and Re-notification) [Confirm the Application (Notification) Information] 1/2

Confirm the information that you entered, and submit the application and the like.

航空機運航情報処理システムをご利用いただきありがとうございます。

申請・届出を受領しましたが、以下の理由により申請・届出をシステムに登録することができませんでした。

- ・同じ許可・届出に対して、同時に複数の手続は行えません。申請中（届出中）の手続きが完了後に、申請・届出の手続きを行ってください。
- ・複数タブ／複数ブラウザで操作された方は、データが破損した可能性があります。再度、申請・届出の手続きを行ってください。

上記理由に心当たりのない方は、予期せぬエラーが発生した可能性があります。
時間を置いて、再度お試しください。提出先官署までお問合せください。

■お問合せ番号

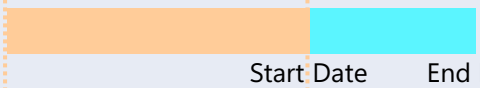

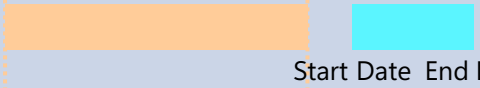

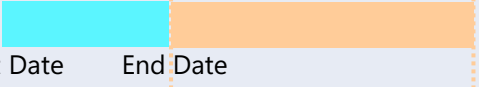

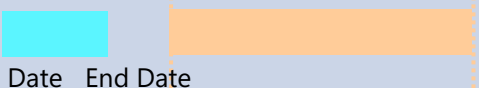

There are two main reasons why reception can fail.

1. Duplicate applications for the same permit and notification in the past
2. Operated in multiple tabs and multiple browsers

If the reasons given above do not seem to apply to you, contact us through ["FAQ"](#) with the following information.

"Login ID" "date and time of receiving the email" "inquiry number written in the email" "terminal (OS) used" "browser used"

[Reference] Conceptual view of flight period when Continuing an Application and Reapplying (continuous notification and re-notification) and changing applications (notification)

| Application Pattern | | Conceptual Diagram (Flight Period) | Remarks |
|--------------------------------------------------------------------------------------------|-----------------------------------------------------|--------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Flight Period of the Original Application (Notification) (Application Notice A) | |  | |
| Flight period for which to file a new application (notification) (Application Notice B) | ■ Continuous Applications (Continuous Notification) |  | The flight start date of Application Notice B is Continued from the day after Application Notice A |
| | ■ Reapply (Re-notification) |  | The flight start date of Application Notice B is After the Next Day After Application Notice A |
| | |  | The flight period of Application Notification B is Prior to Application A Flight Start Date * Not often envisioned to be a case. |
| | |  | |
| | ■ Change Application (Change Notification) |  | Flight end date cannot be changed * With permission of Application B, Application A is voided. (Excluding Change Notification) |
| | |  | Flight end date cannot be changed * With permission of Application B, Application A is voided after the flight period start date. (Excluding Change Notification) |

[Reference] Conceptual view of flight period when continuing applications and reapplying (continuous notification and re-notification) and changing the application (notification)

01. Flow of Changes to Applications (Notifications)

The following shows the flow when making changes to application (notification) using this system.

Start the procedures for the new application (notification).

Confirm each master control information.

For changes to the aircraft, pilot, passenger (for Article 81 in the Civil Aeronautics Act), and take-off and landing area information (for Article 79 in the Civil Aeronautics Act), always change the registration from the master control information before starting the procedure. (It is not possible to add or revise this information on the information entry screen for each application (notification).)

* If you have deleted the information of take-off and landing area selected in the application in the past, you cannot apply for change.

* If you deleted the aircraft information and pilot information selected in the previous application, please select additional check boxes in the dialog box.

[Select Changes to Application \(Notification\)](#)

Select the "Changes to Application (Change Notification)" button in the Main Menu.

[Select the Application \(Notification\) to Implement Change Procedures](#)

Select the application (notification) to implement changes to the application (changes to application) from the application information list and select the item to change.

[Revise the Application \(Notification\) Information](#)

Revise the application information on the entry screen for each application (notification) information.

[Confirm the Application \(Notification\) Information](#)

Confirm the information that you entered, and submit the application and the like.

Changes to Applications (Notifications) are complete

The application date/notification date is the date when the "OK" button is pressed in the application submission confirmation dialog.

02. Changes to Applications [Select Change Application (Notification)]

* For changes to the aircraft information, pilot information, passenger information (for Article 81 in the Civil Aeronautics Act), and take-off and landing area information (for Article 79 in the Civil Aeronautics Act), always change the registration from the master control information before starting the procedure.

For the input method for application information in the [Enter Basic Information] screen and the [Enter Information by Application] screen, it is the same as that described in the manual "[New Applications \[Enter Basic Information\] screen and \[Enter Information by Application\] screen](#)".

- * Items that can be changed will vary depending on the details selected in the dialog box to select the items to change.
- * Input is restricted to items that cannot be changed. If you are unable to make the necessary corrections, retry the procedure or make a new application to review the selection of "Items to Change".
- * In the conceptual view of the screen on the left is an example of the screen display when the applicant is an individual.

04. Changes to Applications (Notifications) [Revise Application (Notification) Information] 4/4

If necessary, revise the application information on the entry screen for each application (notification) information. (Continued)

On the [Select Aircraft Information] screen, when selecting a model that is not included in the original application of the change application (notification), you cannot transition to the next screen without selecting "Changes Other Than the Above."

* For items that have been selected once, you cannot clear the selection later.

* It is acceptable to select a different "nationality and registration mark" with a model that is the same as the model included in the original application of the change application (notification).

05. Changes to Applications (Notifications) [Confirm the Application (Notification) Information] 1/2

Confirm the information that you entered, and submit the application and the like.

■お問合せ番号

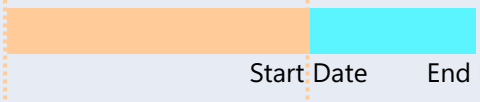

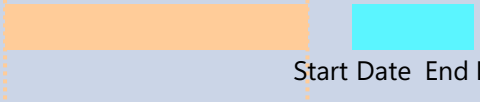

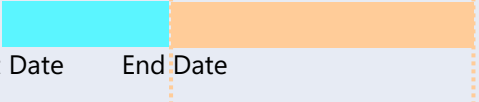

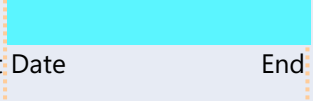

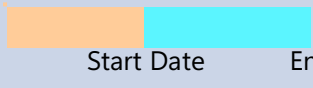

There are two main reasons why reception can fail.

1. Duplicate applications for the same permit and notification in the past
2. Operated in multiple tabs and multiple browsers

If the reasons given above do not seem to apply to you, contact us through ["FAQ"](#) with the following information.

"Login ID" "date and time of receiving the email" "inquiry number written in the email" "terminal (OS) used" "browser used"

[Reference] Conceptual view of flight period when continuing applications and reapplying (continuous notification and re-notification) and changing applications (notification)

| Application Pattern | | Conceptual Diagram (Flight Period) | Remarks |
|--------------------------------------------------------------------------------------------|-----------------------------------------------------|--------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Flight Period of the Original Application (Notification) (Application Notice A) | |  | |
| Flight period for which to file a new application (notification) (Application Notice B) | ■ Continuous Applications (Continuous Notification) |  | The flight start date of Application Notice B is Continued from the day after Application Notice A |
| | ■ Reapply (Re-notification) |  | The flight start date of Application Notice B is After the Next Day After Application Notice A |
| | |  | The flight period of Application Notification B is Prior to Application A Flight Start Date * Not often envisioned to be a case. |
| | |  | |
| | ■ Change Application (Change Notification) |  | Flight end date cannot be changed * With permission of Application B, Application A is voided. (Excluding Change Notification) |
| | |  | Flight end date cannot be changed * With permission of Application B, Application A is voided after the flight period start date. (Excluding Change Notification) |

Procedures After Verbal Permission

Table of Contents

01. Flow of Procedures After Verbal Permission
02. Procedures After Verbal Permission [Select Procedures After Verbal Permission (In Case of a Disaster, or the Like.)]
03. Procedures After Verbal Permission [Select the Application to Be Processed After Verbal Permission (Article 79, Article 81, and Article 89 of the Civil Aeronautics Act)]
04. Procedures After Verbal Permission [Enter Basic Information and Information by Application]
05. Procedures After Verbal Permission [Confirm the Application (Notification) Information]
06. Procedures After Verbal Permission [Confirm the Submission Complete E-mail]

01. Flow of Procedures After Verbal Permission

Register each master control information

The aircraft information, pilot information, passenger information (for Article 81 in the Civil Aeronautics Act), and take-off and landing area information (for Article 79 in the Civil Aeronautics Act) that are required for the application must be registered in advance.

Start the procedures after verbal permission

Select the procedures after verbal permission (in case of a disaster or the like)

Select the "Procedures After Verbal Permission (In Case of a Disaster or the Like)" button in the Main Menu.

Select the application to Be processed (Article 79, Article 81, and Article 89 of the Civil Aeronautics Act)

Select the information related to the verbal permission, the target article, the type of aircraft, the location for action to be implemented, and the application destination (notification destination).

Enter basic information and information by application

Enter the applicant information, and an overview of the flight plan, and each application (notification) information and the like relating to each target Article. (Refer to the manual for new applications.)

Confirm the application (notification) information

Confirm the information that you entered, and submit the application form and the like.

Procedures after verbal permission are complete

The "verbal application date (notification date)" entered on the [Procedure Selection] screen is the application date/notification date for the application form and the like.

02. Procedures After Verbal Permission [Select Procedures After Verbal Permission (In Case of a Disaster, or the Like.)]

* It is necessary to register each master control information in advance for the aircraft information, pilot information, passenger information (for Article 81 of the Civil Aeronautics Act), and take-off and landing area information (for Article 79 of the Civil Aeronautics Act) that are required for the application.

(1) In the [Main Menu] screen, press the **口頭許可後の手続き（災害時等）** in the heading [Create an Application Form (Notification Form)].

The screen for selecting the application procedure is opened.

03. Procedures After Verbal Permission [Select the Application and the Like to Be Processed (Article 79, Article 81, and Article 89 of the Civil Aeronautics Act)]

Select the information related to the verbal permission, the target article, the type of aircraft, the location for action to be implemented, and the application destination (notification destination).

(1) Enter the information related to the verbal application and notification.

* Enter "None" in the "(Temp) Permit No. (Receipt No.)" field if the (temp) permit number (receipt number) has not been received or it is unknown.

(2) The method for entering the [Procedure Selection] screen is the same as the manual "[New Applications \[Procedure Selection\] screen](#)".

(3) After confirming that there are no errors in the details entered, press the **基本情報の入力** button.

The [Basic Information Input] screen is displayed.

04. Procedures After Verbal Permission [Enter Basic Information and Information by Application]

Select or enter the basic information (applicant information, flight plan overview), information by application (application (notification) information relating to Article 79, Article 81, and Article 89 of the Civil Aeronautics Act, pilot, aircraft, and passenger information), according to each screen.

Withdrawal and Resubmission of an Application

Table of Contents

- 01. Flow of Withdrawal and Resubmission of an Application
- 02. Withdrawal and Resubmission of an Application [Select Application Information List]
- 03. Withdrawal and Resubmission of an Application [Withdraw an Application (Notification)]
- 04. Withdrawal and Resubmission of an Application [Resubmit an Application (Notification)]
- 05. Withdrawal and Resubmission of an Application [Confirm the Submission Complete E-mail]

01. Flow of Withdrawal and Resubmission of an Application

The following shows the overall flow for withdrawing and resubmitting an application and/or notification that has been submitted once.

[Select the Application Information List](#)

Select the "Application Information List" button in the Main Menu.

When withdrawing an application (notification) that has been submitted once *1

[Withdraw an application \(notification\)](#)

Press the "Withdraw" button for the corresponding application (notification) from the Application Information List, and confirm the application information from the [Application Information Details] screen before withdrawing it.

When resubmitting a withdrawn application (notification) *2

[Resubmit the application \(notification\)](#)

Press the "Resubmit" button for the corresponding application (notification) again, from the Application Information List. Revise the details of the application (notification) and resubmit the application form and the like.

Withdrawal and/or resubmission is complete

* 1: Withdrawal is possible only before the document is received.

* 2: Resubmission is possible for withdrawn applications, and the like and applications with revision instructions.

* To resubmit an application or the like with revision instructions, see [this](#).

02. Withdrawal and Resubmission of an Application [Select Application Information List]

(1) In the [Main Menu] screen, press the  in the heading [Create an Application Form (Notification Form)].

Open the [Application Information List] screen.

03. Withdrawal and Resubmission of an Application [Withdraw an Application (Notification)]1/2

Withdraw an application (notification) that has been submitted once.

基本情報の入力

Revise the information of the application (notification) selected in the [Application Information List].

For the input method of each input screen
([Procedure Selection] screen → [Enter Basic Information] screen
→ [Enter Information by Application] screen), see the manuals for
"[New Applications](#)," "[Continuing an Application and Reapplying](#),"
and "[Changes to Applications](#)."

04. Withdrawal and Resubmission of an Application [Resubmit an Application (Notification)]4/5

Resubmit a withdrawn application (notification). (Continued)

The screenshot shows the '入力した申請情報の確認' (Confirmation of Entered Application Information) screen, which is STEP 04 of a 5-step process. The steps are: STEP 01 手続き選択, STEP 02 基本情報入力, STEP 03 申請別情報入力, STEP 04 申請情報確認 (highlighted), and STEP 05 申請提出. Below the steps, there is instructional text: '入力した各情報を確認の上、「申請提出」ボタンを押してください。' (Please confirm the entered information and press the 'Application Submission' button.), '入力内容に誤りがある場合は各情報下部にある「修正」ボタンを押下し訂正してください。' (If there is an error in the input content, please press the 'Correction' button at the bottom of each information section to correct it.), and '入力内容を一時保存したい場合は下部にある「一時保存」ボタンを押下してください。' (If you want to temporarily save the input content, please press the 'Temporary Save' button at the bottom.). The form contains two sections: '手続き情報' (Procedure Information) and '基本情報、飛行計画の概要' (Basic Information, Overview of Flight Plan). The '手続き情報' section has fields for '手続き名' (Procedure Name), '航空機の種類' (Aircraft Type), '申請先' (Applicant), and '申請/届出' (Application/Notification), with values: '最低安全高度以下の高度での飛行（航空法第81条ただし書の規定による申請）', '回転翼航空機', '東京空港事務所長', and '申請' respectively. The '基本情報、飛行計画の概要' section is currently empty. At the bottom, there are three buttons: '戻る' (Back), '一時保存' (Temporary Save), and '申請提出' (Application Submission). Annotations include: (4) next to the '申請/届出' field; a red box around the '手続き情報の修正' (Correction of Procedure Information) button; (5) next to the '一時保存' button; and (6) next to the '申請提出' button.

入力した申請情報の確認

航空機運航情報処理システムをご利用いただきありがとうございます。

申請・届出を受領しましたが、以下の理由により申請・届出をシステムに登録することができませんでした。

- ・同じ許可・届出に対して、同時に複数の手続は行えません。申請中（届出中）の手続が完了後に、申請・届出の手続きを行ってください。
- ・複数タブ／複数ブラウザで操作された方は、データが破損した可能性があります。再度、申請・届出の手続きを行ってください。

上記理由に心当たりのない方は、予期せぬエラーが発生した可能性があります。
時間を置いて、再度お試しください。提出先官署までお問い合わせください。

■お問合せ番号

There are two main reasons why reception can fail.

1. Duplicate applications for the same permit and notification in the past
2. Operated in multiple tabs and multiple browsers

If the reasons given above do not seem to apply to you, contact us through ["FAQ"](#) with the following information.

"Login ID" "date and time of receiving the email" "inquiry number written in the email" "terminal (OS) used" "browser used"

基本情報の入力

Revise the application (notification) selected in the [Application Information List].

For the input method of each input screen ([Procedure Selection] screen → [Enter Basic Information] screen → [Enter Information by Application] screen), see the manuals for "[New Applications](#)," "[Continuing an Application and Reapplying](#)," and "[Changes to Applications](#)."

04. Check the Details of the Revision Instructions and Resubmit [Resubmit the Application (Notification)] 1/2

Confirm the information that you entered, and submit the application form and the like.

Make a final confirmation of the application (notification) information.

- (1) If there is an error in the inputted details, press the **●●の修正** at the bottom right of each information to revise the information.
* When you press the "**●●の修正**" button for each screen, you will transition to the appropriate screen. After correcting the information you entered on each screen, please use the button in the center of the bottom row to move to this screen.
- (2) If you want temporarily to save the application information, press the **一時保存**.
Also, if you want to edit the temporarily saved application again, see [this](#).
- (3) If there is no problem with the details you entered, press the **申請提出**.
A dialog box is displayed for confirmation before submission.

04. Check the Details of the Revision Instructions and Resubmit [Resubmit the Application (Notification)] 2/2

Confirm the information that you entered, and submit the application form and the like. (Continued)

申請／届出を行います。
※以下のOKボタンの押下日が「申請日／届出日」となります。

OK キャンセル

When you press the **OK**, the application form is submitted to the application destination.

- * If you want to resubmit the application and the like that had revision instructions, the [application date/notification date] will remain the date originally submitted.

An email will be sent to confirm your submission of your application form (notification).

- If received successfully, you will receive an email stating that the submission has been completed.
- If we fail to receive it, you will receive an error email stating that the system was unable to accept it.

When submitting an application form (notification), check the email related to the submission confirmation.

- * Refer to the next slide that provides a conceptual view of the email.

If received normally, check the content, such as the items listed in the application destination.
